INTRODUCTION

KitchenX is a modern B2B supply chain and fintech platform built specifically for the Indian HORECA (Hotels, Restaurants, and Catering) sector.

We sit at the intersection of direct manufacturer procurement and embedded trade finance. KitchenX enables restaurant owners, QSRs, and cloud kitchens to procure raw materials (staples, frozen goods, dairy, packaging) directly from top FMCG manufacturers at wholesale prices, backed by integrated 30-day revolving credit lines to optimize their back-of-house cash flow.

CORE BRAND PHILOSOPHY

1. Quiet Luxury meets Industrial Infrastructure: We are not a consumer food delivery app. Avoid generic food cliches (no chef hats, crossed forks, leaves, or cartoonish graphics).
2. Tone & Persona: Precise, authoritative, tech-forward, and institutional. Think Stripe meets Flexport for restaurant back-of-house ops.
3. Key Values: Transparency, speed, liquidity, precision, and operational efficiency.

BRAND NAME & POSITIONING

1. Brand Name: KitchenX
2. Tagline: Smarter Procurement. Instant Credit.
3. Target Audience: Enterprise food manufacturers (Cargill, Godrej, Parag), NBFC/banking credit partners, and restaurant owners/kitchen managers.
